

Class 2 Spring Term 2026 Homework Web

The following activities have been planned to complement our class topics. Upon completion of the homework, share it with the class and your teacher in order to receive team-points for your homework chart.

The use of Seesaw is recommended. Good luck!

English

Why not listen to some sounds of the rainforest (Google it)? What words describe what you hear?

Write a short poem of this experience:

Raindrops splash on leaves,
Never-ending waterfall,
Green jewels are sparkling.

Maths

Investigate the Maya alphabet and number system.

Can you create a poster about you using them?

For example, write your name in Maya hieroglyphics and your age in Maya numbers!

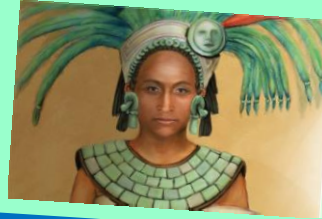

Design and Technology

Make a Maya head dress.

Who would wear it?

What would they use to make it?

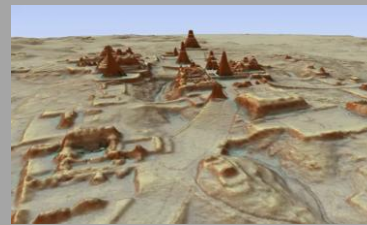

Art

Rainforests are naturally very green! How many different greens can you collect from magazines or paint or colour? Put them on a chart in an order you like. Why not write new names for them like 'sap', 'moss'.

Geography

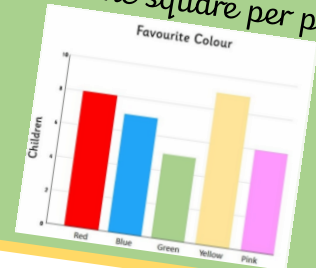

Make a 3D map of where the Maya people lived in South America.

R.E.

What kind of world do people say they want to live in?

Ask a few people that question. Create a simple bar chart of their results. One square per person.

Computing

Investigate how the Maya people used the sun, moon and planets.

Can you copy and paste some information you find online onto a new document? You may also want to attach a picture!

P.S.H.E.

Devise a healthy recipe using foods that the Maya people would eat.

P.E.

Research how to play the ancient ball game: Pok-A-Tok

Can you play it and send in photos?

Don't forget you still need to read every day, practise weekly spellings and learn your times tables.

In addition to this, children may be given additional tasks to revise and reinforce learning.
